The digitalisation of the hotel and catering sectors has totally reinvented and destructured processes and professions. The new **digitalization & phygitalization** solutions are overturning traditional codes to ultimately enhance and preserve **the human element**... and it is hospitality that is changing dimension!

A **digital (r)evolution** that is welcomed by both clients and professionals, initiated and accelerated thanks to **technological advances** but above all to respond to **societal changes**.

Autonomy, eco-responsibility, simplification & design are the key words of these supports and solutions that will compose the **smart hotels & restaurants** of tomorrow.
